

Le Pirate Restaurant

This place is about seafood and pirates, two things Emiratis are passionate about. They promise and experience to remember starting with the minute their customers step inside.

To live up to that promise, they required furniture that was custom built to their theme and of the highest craftsmanship. After visiting many woodworking factories who didn't have the capacity/capability to produce the furniture, the owner found us and we gave it a shot. The resulting furniture is for anyone to see, use and judge at the restaurant.
